- Wilson Hazardous Substance Discharge Complaint
- Wilson Lead Abatement Complaint

APPROVAL OF MINUTES:

- September 13, 2017-Board of Health Meeting
- October 11, 2017-Board of Health Meeting

CORRESPONDENCE / ANNOUNCEMENTS:

- Received a letter dated October 19, 2017 from the Hunterdon County Health Department indicating that Brew NJ d/b/a Brew 362 has re-purposed the business located at 362 Pittstown Road, Pittstown, NJ. Brew 362 eliminated any food preparation on the premises. Brew 362 plans to open a “General Store” at the above address and will sell only pre-packaged food items. Seating has also been eliminated inside the store. Also, brought to the attention of the County Health Department is that the second floor is tenant occupied. The apartment has separate access and is not connected to the “General Store” at all. The impact of the septic system which is designed to handle the flow generated by the apartment and the business in the same. The County Health Department has noted that this new information does not affect the approval to open the business as a “General Store” offering pre-packaged food items.

- Received a letter dated October 17, 2017 from the Hunterdon County Health Department stating that they can't approve the Construction Permit Referral that was submitted by St. Thomas Episcopal Church Group due to the fact that the proposed classrooms and gathering area seating exceeds the Individual Subsurface Sewage of 100 seats maximum capacity by 98 seats.
- The New Jersey Department of Health with assistance from the Centers for Disease Control and Prevention have identified a New Jersey resident infected with Brucella abortus RB51 which is associated with consumption of raw (unpasteurized milk or raw milk products). Brucella abortus RB51 is used to vaccinate cattle against brucellosis infection. Symptoms of this infection are fever, sweats, anorexia, headache, fatigue and muscle/joint pain. Severe infections of the central nervous system or lining of the heart may occur. Brucellosis is rare in New Jersey with three cases reported in the last 5 years.
